

Delivering Hybrid Programming

Would you like to feel more comfortable delivering hybrid programming? Need some tips regarding the equipment and logistics of planning and delivering a hybrid program at TSCPL? Would you like a chance to talk with other programming staff at TSCPL about hybrid and how it's going? Join us for a training series!

DESCRIPTION: Hybrid programs are classes or events that are run in-person and virtually so patrons can choose to attend the event in either format. The Programming Librarian (a website of the American Library Association's Public Programs Office) is offering a free training series April – November 2022. TSCPL staff will have the opportunity to review the Programming Librarian training and then apply what is covered to TSCPL programming.

<https://programminglibrarian.org/articles/hybrid-programming-webinar-series>

FORMAT: This training will include participation in the Programming Librarian 2022 series on hybrid programming followed by opportunities to apply that learning to the technology, spaces, and programs at Topeka and Shawnee County Library. Discussions and activities will contribute to comfort with, and quality of hybrid programming offered at TSCPL. Participants will be able to participate in one or more sessions based upon their needs and interests.

PARTICIPANTS: Open to programming staff

FACILITATORS: Jacqueline Belden and Brenda Hough

SCHEDULE

	Date:	Activity:	Location:
Module 1	<i>Any time prior to June 2, 2022</i>	 Watch the recording of the April 13 session, " Hybrid: A New Take on Post-Pandemic Programming " (18 ½ minutes) and watch the recording of the May 18 session, " When to Go Hybrid: Determining Which Format Best Fits Your Program "	On Your Own
